

Metallic — channel tray

Covers — cover selection guide

A Tray covers

Tray covers are available for all widths of tray. They should be installed where falling objects may damage cables or where vertical tray run is accessible by pedestrian or vehicular traffic.

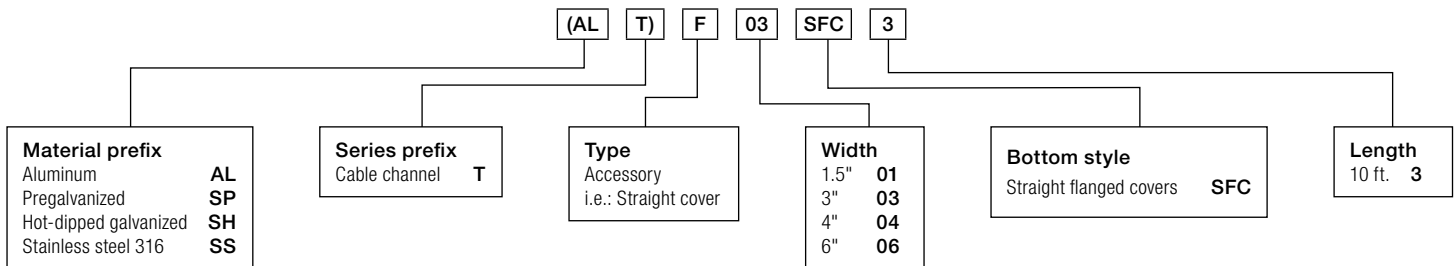

Straight covers

- These covers provide maximum mechanical protection for cables with limited heat build up.
- Flanged covers have a ½" flange.

Note: Cover mounting hardware must be ordered separately.

Straight cover number selection

*Hot-dipped galvanized covers only available in 1500mm lengths

Quantity of standard cover clamps required

Straight section (10 ft.): 6 pieces

Note: When using heavy-duty cover clamps, only half the quantity of pieces are required.
