

AV SOLUTIONS | Multimedia Outlet System (MOS)

MULTIMEDIA OUTLET SYSTEM (MOS)

The innovative Multimedia Outlet System (MOS) consists of a surface-mount box and single- and dual-gang wallplates that accept a variety of copper, fiber, and AV connectors. The system is ideal for multimedia applications in conference rooms, training rooms, classrooms, auditoriums, and other areas.

- Front-load installation ensures simple moves, adds, and changes
- Modules are available in 0.5, 1, 1.5, 2, and 3-unit high sizes
- Accommodates a combination of QuickPort® connectors and larger AV components such as 3-port composite/component RCA and HD-15 connectors
- Large Surface-Mount Box accepts 3 modules (1-unit high only)
- Wallplates accept 3-units high total
- New Surface-Mount Housing (pictured below) accepts one 1-unit high module and is plenum rated for use in air handling environments

QUICKPORT & MOS COMPATIBILITY

The highly flexible front-loading Multimedia Outlet System (MOS) and QuickPort® Solutions work together to provide hundreds of possible configurations. Select MOS, MOS and QuickPort, or QuickPort only configurations. Blank inserts are also available to create a finished look when building in extra capacity for future growth. For more information about configuring your MOS installation, visit Leviton.com/MOS.

MOS MODULES WILL ALSO WORK WITH DECORA® WALLPLATES

Just snap one-unit high modules into Decora inserts.

See page B66 for the complete line of fiber adapters.

DECORA® STRAUSS™ TRANSFORMER-FREE VOLUME CONTROLS

- Contemporary slider design brings precision and elegance to any installed audio system
- Available in standard and impedance-matched versions
- Volume control uses standard Decora wallplate in a standard J-Box or low-voltage mounting ring
- Color-change kits ensure the right finishing touch for every application

1X6 AUDIO DISTRIBUTION MODULE

- Combines with impedance-matching Volume Controls to control up to six speaker pairs from an amplifier or receiver
- Designed to mount in Leviton Structured Media enclosures and connect to six rooms/zones

SYSTEM MATCHING MODULE

- Combine with non-impedance-matching Volume Controls to control up to six speaker pairs (cannot be used with impedance-matching volume controls)
- AutoSurge® circuit technology protects speakers from potentially damaging transients
- Designed to mount in Leviton Structured Media® Enclosures

SPOTLIGHT Impedance Matching Difference

When installing an audio system, it is important to have an impedance-matching component paired with a standard component. Failure to do so may have a negative effect on the audio system.

Do NOT use an impedance-matching volume control with an impedance-matching module, and do NOT use a standard volume control with a passive audio module. Doing so, in either instance, could damage the amplifier.
